Phone

Google G

Apple

The image shows a mobile app login screen. At the top, there is a status bar with the time 6:42, signal strength, Wi-Fi, and battery icons. Below the status bar, the text "Enter your phone number to log in" is displayed. Underneath this text is a text input field with the placeholder "Phone" and a pre-filled value "+1". Below the input field are three large, rounded rectangular buttons. The first button is labeled "Phone". The second button is labeled "Google" and features the Google "G" logo. The third button is labeled "Apple".

### Description:

The login screen initiates user access when they're not logged in. It offers two main login paths: via phone number or through Google/Apple accounts. Features include error handling, strong security measures, accessibility considerations.

### Phone Verification Screen

6:42

#### Enter the code

We have send the code to the number +1...

Code

123456

Log in

### **Description:**

Upon logging in with their phone number, users are directed to a verification screen. Here, they're prompted to enter the code sent to their phones, ensuring the verification of their identity.

## Welcome Screen

6:42

Welcome!

Go to Home

### Description:

The welcome screen greets customers upon app entry, extending a warm introduction to the platform.

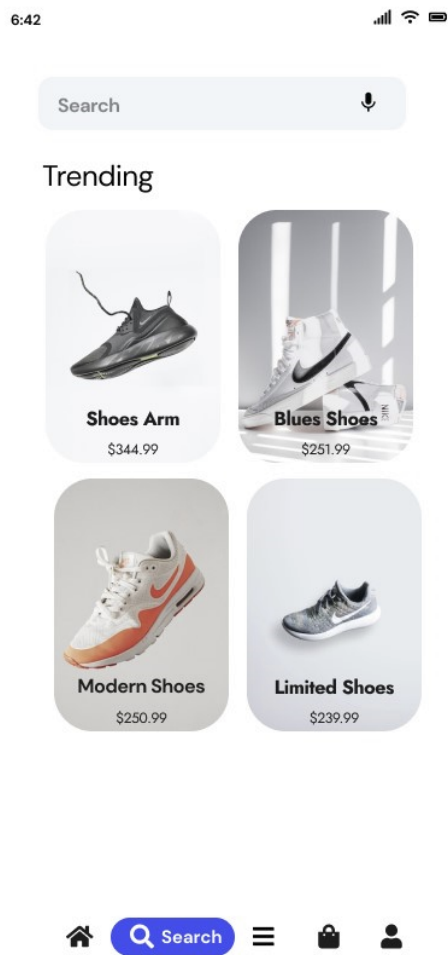

## Home Screen

### Description:

Following the welcome screen, users are directed to the home screen. Here, they can perform diverse actions—like listing items for sale, exploring featured/recommended items leading to the products page, or utilizing bottom navigation for seamless app navigation.

## Search Screen

### Description:

The search screen showcases trending items and enables users to explore and find specific items within the app.

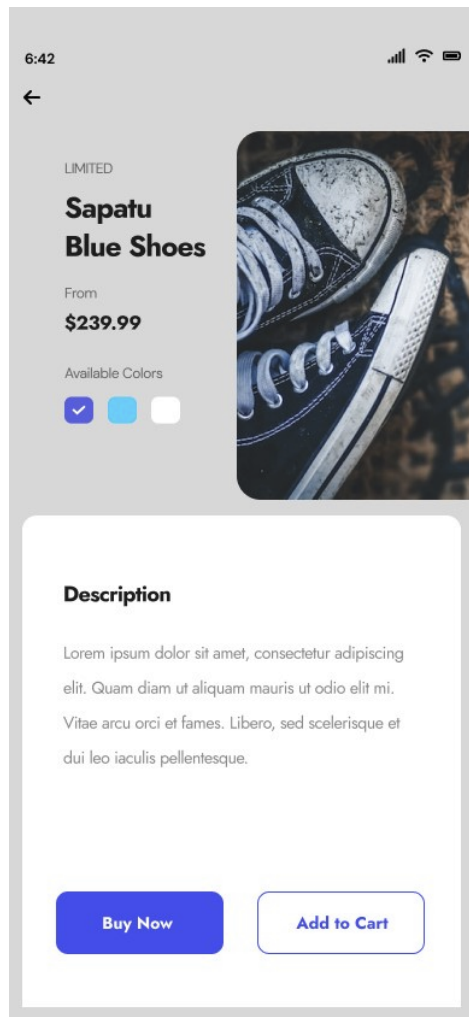

## Search Result Screen

Description:

The search result screen mirrors the search page design, displaying the user's searched keyword and a scrollable list of items closely matching their query.

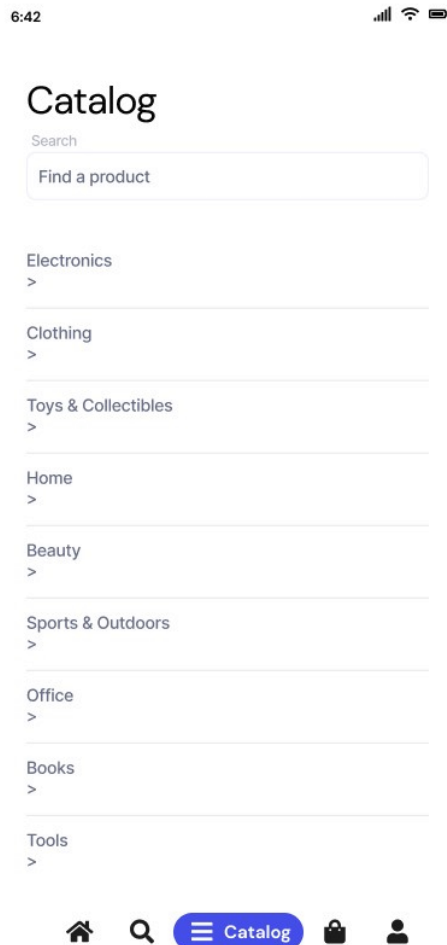

## Product Screen Page

Description:

When clicking on any item in the app, users will be redirected to the product screen where they can view different details about the product such as the image, name, if it is limited or not, price, available colors and as well as a description of the product. In this screen, users also have the option of adding the item to their cart or immediately buying the item.

## Catalog

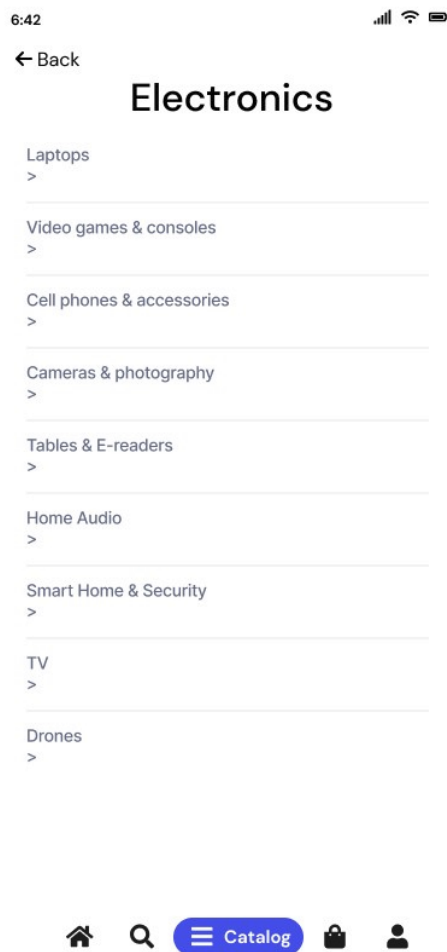

Description:

The catalog screen allows the users to find a product based on the different categories currently available in the app. If they're not sure what type of product they are looking for, they can go to this screen to get an idea of what type of product they would like to buy.

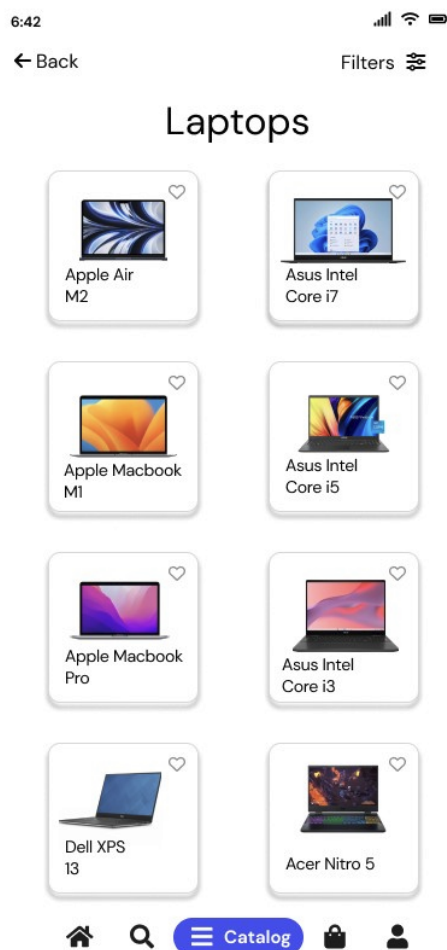

## Subgroup Screen

Description:

The subgroup screen can be accessed from the catalog. When clicking on a main category, users will be redirected to this screen to allow them to browse through more specific type of items available.

### Grid View Screen

Description:

Users will be redirected to the grid view screen after clicking on a specific subgroup. In this example, all the available laptops are shown to the user along with an image of the item and clicking on these grids will redirect the user to the products page. Users can click on the top right icon to filter out this list.

### Filters Screen

Apply Filters

Description:

When the user clicks on the filters screen, they can adjust different settings to customize the list of products that they are currently viewing. They can change the size of the view, the price range, brand and color. Users can click on the brand and color section to get a list of brands and colors available.

### Set Filters Screen

The screenshot shows a mobile application interface for setting filters. At the top, the status bar displays the time 6:42 and signal icons. Below the status bar is a navigation bar with a back arrow and the text 'Back'. The main heading is 'Brands'. Below the heading is a search bar with the placeholder text 'Search for a brand'. Under the search bar, there are several brand names listed, each preceded by a radio button. The brands are: A (Acer, Asus, Alienware, Apple), D (Dell), L (Lenovo), M (Microsoft), and R (Razer). The 'Apple' brand is selected, indicated by a filled radio button.

Description:

Users will be redirected to the set filters screen where they can choose one or more brands/colors to specify the type of items that they would like to view.

## List View Screen

### Description:

User will have access to a list view on his screen of the different article available to be buy. He will have access to three buttons to give him a range of possibility between liking, putting into and.

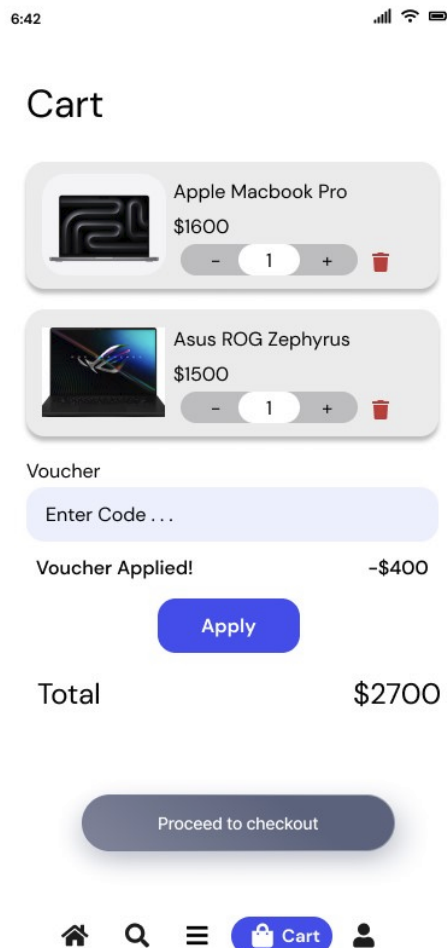

## Large Thumbnail Screen

### Description:

User will have access to a feed via his Catalog showing him the list of article he can either buy or like.

## Cart Screen

### Description:

Afterwards, the user gains access to their cart screen displaying all selected items for purchase. Here, they receive a comprehensive summary detailing the total amount due, along with a variety of choices such as adjusting quantities, applying a voucher code, or proceeding to checkout.

Address

City

State

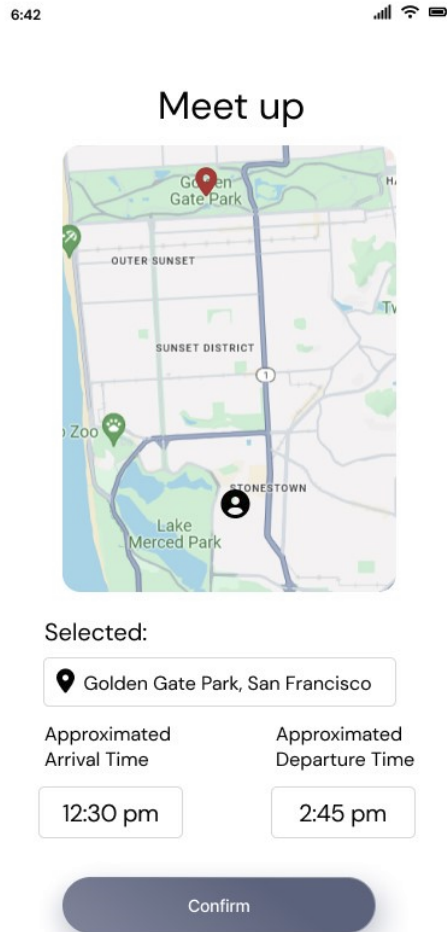

Zip Code

Add new address

### Description:

The user can access the "Add New Address" screen, enabling them to input details for a new shipping address. They'll also have the option to confirm and save this newly added address.

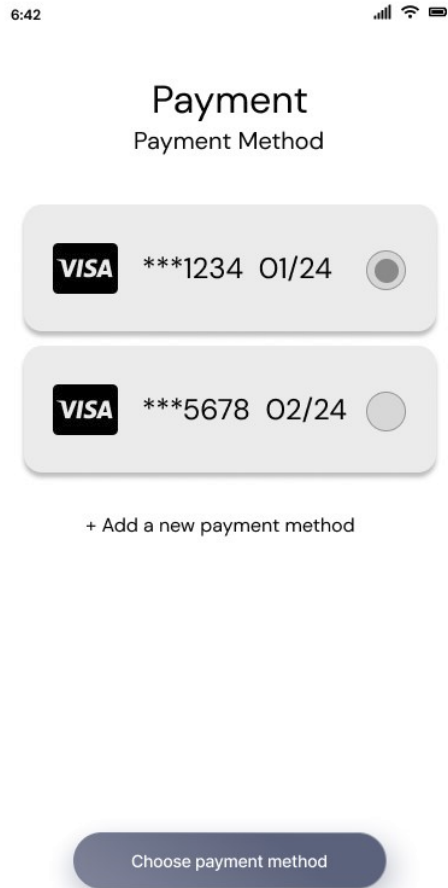

## Meet Up Screen

### Description:

The user can access the "Meet Up" screen, featuring a map displaying both their current location and the destination. Crucial details like arrival and departure times are highlighted. Additionally, the user can modify the destination address from this screen.

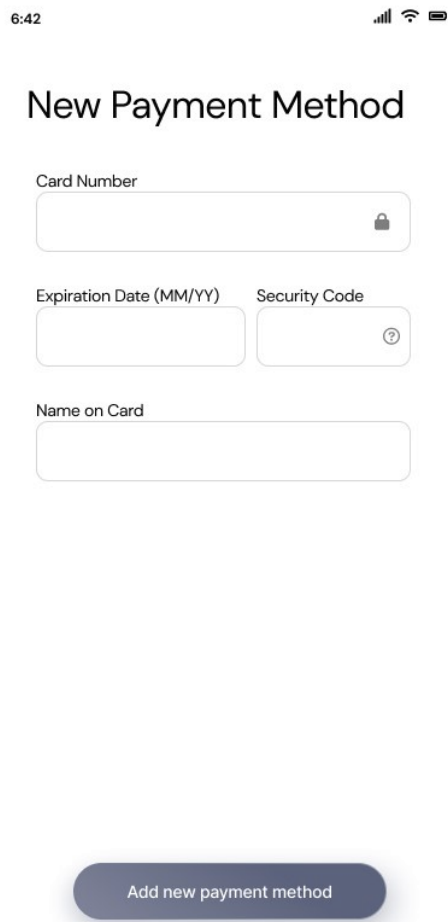

## Payment Screen

### Description:

The user can enter the "Payment" screen, where a list of payment cards is presented, giving them the option to select the preferred card for the transaction. Additionally, they can add a new card from this screen.

## Add new payment method Screen

The image shows a mobile application screen titled "New Payment Method". At the top, the status bar displays the time "6:42" and icons for cellular signal, Wi-Fi, and battery. The title "New Payment Method" is centered below the status bar. The form consists of three input fields: "Card Number" (with a lock icon on the right), "Expiration Date (MM/YY)" (with a question mark icon on the right), and "Security Code" (with a question mark icon on the right). Below these fields is a "Name on Card" input field. At the bottom of the screen is a dark blue button with the text "Add new payment method".
